

## Amendment 4 RFP No: 2017-2 May 30, 2017

---

Credit card equipment (EMV compliant or otherwise) is no longer required in the scope and requirements of RFP No. 2017-2. MDAH will purchase credit card processing equipment independently from this RFP. The POS terminals must have the capability to direct connect to USB connectors, with other connection options present or the ability to upgrade to other connection options. Mobile POS tablets also do not require credit card processing attachments. Vendors responding to this RFP should not apply credit card equipment costs in their cost proposal.

This amendment applies changes **in red** to following sections of RFP No. 2017-2:

Section VII: Technical Specifications p. 39:

- 8.3 The **retail point of sale (POS) system** will require a diverse software solution that provides multiple functions. All five locations will require retail point-of-sale. This includes touchscreen point of sale, barcode scanner, barcode label printer, receipt printer, **terminals with USB ports (in addition to any others available) to attach credit card readers**, mobile POS **with ability to attach credit card processing equipment** at the 2 Mississippi Museums, multiple site users, and multiple inventory functions. The retail point of sale system must be functional at the 2 Mississippi Museums site in September and onsite training at this location must occur prior to October 1, 2017. The selected software system should have an online store platform for future online store sales. The software system must be able to provide options for working offline in the event of power or network outages. Concise and customizable reporting for all of these features is necessary. The following software functions are necessary to effectively and efficiently manage the Mississippi History Store services:

Section VII: Technical Specifications p. 40:

- 8.3.3 **REMOVED – NO LONGER A REQUIREMENT (RFP Responders are not required to reply)**

Section VII: Technical Specifications p. 47:

- 10.1 Each of the five sites requires POS terminals that have at least 15” – 17” touchscreen monitors, cash drawers, barcode scanners, receipt printers ~~and EMV compliant credit card processing with customer signature capture screen (EMV equipment no longer required)~~. Five terminals will require a barcode label printer – three of these at the 2 Mississippi Museums. One of the MDAH sites will require two mobile POS devices (tablets) with ~~credit card processing and~~ receipt printing capability. One of the MDAH sites will require two scanners for ticket redemption plus one backup. The following table displays the equipment requirements for each site:

Site	Touchscreen POS Terminal <del>with EMV compliant credit card processing (EMV No Longer Required)</del>	Barcode label printer attached to a POS Terminal	Mobile POS Tablet and receipt printer	Ticket redemption scanner
2 Mississippi Museums	4	3	2	3
Eudora Welty House and Garden	1	0	0	0
Old Capitol Museum	1	0	0	0
Grand Village of Natchez Indians	1	1	0	0
Historic Jefferson College	1	1	0	0
